Nine schools competed in both the National Debate Tournament and the National Speech Tournament in 2024. Each school's final ranking relative to the other schools is shown in the columns labeled NDT Rank and NST Rank. The cumulative total of the relative ranks is included in the column marked Total Re-Rank. Ties on Total Re-Rank have not been broken so as not to show a preference for either tournament. Final NDT relative ranks were determined by counting number of wins for all teams from a school; ties were broken on number of ballots for all teams from a school, and total number of speaker points for all teams from a school. Final NST relative ranks were determined by using sweepstakes results; there were no schools receiving zero sweepstakes points and thus no need to calculate the next tie-breakers (number of events in which students from a school competed and, whenever possible, the relative results of students competing in those events).
